

Blue Grass Chemical offers flexible toll-processing solutions tailored to your needs. In addition to bringing your technology to full-scale production, we also specialize in manufacturing metal salts and other blended products for our customers. Our team of experts can custom blend mixtures of metal salts and other specialty chemicals to your exact specifications—going beyond our standard offerings to meet your unique requirements.

Blue Grass also toll-produces finished products for companies looking to outsource their production, providing expertise, precision, and reliability at every stage.

Don't see your product requirement here? Let us manufacture it for you! For more information about our metal salts, toll processing, and custom manufacturing services, contact us today!
